Foreword

THIS REPORT continues the annual release of Medicare enrollment figures begun with data for 1966. The number of persons insured under the two parts of the Health Insurance for the Aged program—hospital insurance and supplementary medical insurance—are shown primarily for July 1, 1972 by age, race, and sex, and by place of residence. Monthly new enrollments, chiefly the result of reaching age 65, and the monthly terminations, chiefly through death, are also shown. Selected data are included for enrollment since the program began. The figures will provide the population base for rates of utilization of medical services covered under the program and planned for publication in other reports of the annual Medicare series.

Many individuals in the Social Security Administration have assisted with the development of this

series. The preparation of the reports is a function of the Division of Health Insurance Studies of the Office of Research and Statistics under the supervision of Howard West, director, and Aaron Krute, deputy director. This report was the responsibility of Martin Ruther, Program Statistics Branch. Important contributions for the tabulation and presentation of the statistical content were made by Robert Dickerson, Robert J. Butler, and Joyce B. Ragin. Computer services were provided by the Division of Health Insurance Statistical Data, Bureau of Data Processing. The General Tables were produced by the "System for Automated Tabular Composition," a computer system at the Social Security Administration headquarters. They were phototypeset on Linotron equipment at the Government Printing Office in Washington, D.C.

JOHN J. CARROLL,
Assistant Commissioner for Research and Statistics.

2.6 All persons ever enrolled during 1972 for hospital and/or medical insurance, by age, race, sex, region, division, and State of residence	2-51

The Statistical System

This publication is a section of a series of statistical reports produced from Medicare program records. Data are presented on a calendar year basis, describing services rendered in the year. The series includes sections on the number and characteristics of enrollees; on the characteristics of participating providers; on inpatient care in hospitals and skilled nursing facilities; on the use of outpatient hospital, home health, and physicians' and other medical services; and overall summaries.

The primary objective of these reports is to provide data to measure and evaluate program operation and effectiveness. Benefit payment operations furnish information about the amount and kind of hospital and medical care services used by persons aged 65 and over, as well as the expenditures for such services. The applications by hospitals, skilled nursing facilities, home health agencies, independent laboratories, and suppliers of portable X-ray and outpatient physical therapy services, to participate in the program provide data on the characteristics of such providers of services. The claim number assigned to each individual serves as the link between the services utilized under Medicare and the demographic characteristics of individual enrollees.

The data-collection system has two inherent characteristics that determine the scope, detail, and flexibility of the available statistics. First, the beneficiary and his medical experience under the program form the basic unit for which data are collected. Second, records for each bill paid under the program and records of diagnoses and surgical procedures for a sample of beneficiaries are maintained on a centralized basis. Except for intermediary operating statistics such as those relating to workloads, costs, and the like, all program statistics are prepared centrally.

THE BASIC RECORDS

The statistical system is based on five related computer records: the health insurance master file, provider record, hospital insurance (Part A) utilization record, medical insurance (Part B) payment record, and the record containing information from medical insurance bills of a sample of supplementary medical insurance enrollees.

THE HEALTH INSURANCE MASTER FILE

The health insurance master file identifies each aged person eligible for health insurance benefits and indi-

cates whether he is entitled to hospital insurance benefits, to supplementary medical insurance benefits, or to both.

This record is used to create a health insurance card that is sent to each insured person. The card contains the individual's claim number (the number used for OASDI or railroad retirement programs). It indicates the entitlement of the individual for each of the two parts of the Medicare program.

The entitlement record provides the population data for each part of the program which serves as the base for the computation of a variety of utilization rates, limited only by its demographic content.

PROVIDER RECORD

Every hospital, home health agency, skilled nursing facility, independent clinical laboratory, and supplier of portable X-ray or outpatient physical therapy services must apply for participation in the Medicare program. Data on the application forms are stored in the central provider record and are updated as facilities are recertified periodically, as new ones apply for participation, or as some leave the program. When the information in this provider file is combined with utilization data, it serves to relate the characteristics of facilities and agencies that provide care to the kinds and amounts of service used by persons insured under Medicare.

UTILIZATION RECORD FOR HOSPITAL INSURANCE

The administration of the hospital insurance (HI) program requires that two items of information be known about each person at the time of his admission to a hospital—his entitlement under the program and the extent to which he has used the benefits available to him.

When the patient is admitted to a hospital, the admission section of the inpatient hospital admission and billing form is completed by the hospital and forwarded through its intermediary to the Social Security Administration's central record. As soon as the record is checked, normally in less than 24 hours, the intermediary is informed of the patient's benefit status and of the number of days of inpatient care to which he is entitled during his current "benefit period."

of the Medicare Program

This information is then forwarded to the hospital. At discharge, the hospital completes the billing section of the form and sends it to the intermediary for payment. When payment is approved, the intermediary forwards the claim to the Social Security Administration for inclusion in the central record.

As part of this process, information on diagnoses and surgical procedures are coded for a 20-percent sample of beneficiaries based on specific combinations of digits in the health insurance claim number. Admission and billing forms are handled in a comparable manner by home health agencies and skilled nursing facilities. The outpatient billing form is also transmitted to the Social Security Administration for entry in the central record after the bill is approved for payment by the intermediary.

All the information on utilization experience in hospital and skilled nursing facilities that is needed to administer the "benefit period" provision is recorded centrally. This information includes stays in certain nonparticipating institutions that meet the definition of a hospital or skilled nursing facility under the law, and days of care not covered or reimbursable under the program.

Each admission and billing form contains both the beneficiary's claim number and the provider's identification number. The resulting record can be readily matched to the beneficiary files and the provider files. By this process, a statistical tape record is created for the sample of insured persons that contains all the available information needed for tabulation from the three files related to HI utilization.

PAYMENT RECORD FOR MEDICAL INSURANCE

Payment or reimbursement under the SMI program is made only after receipt by the carriers (intermediaries involved in Part B of the Medicare program) of bills with allowed charges in excess of \$50 during a calendar year.

For the enrolled population, carriers need to know from a central source the amount of the deductible that has been met; thereafter, during the remainder of the calendar year, the only additional information required from the Social Security Administration for reimbursement or payment purposes is whether the person is still enrolled under the SMI program.

For administration and operation of the program, the Social Security Administration must have accurate and complete information on the amounts paid by the carriers for physician services and for other services and supplies under this part of the program. To meet these needs, carriers furnish a payment record consisting of tape, punched card, or other machine-readable form of each bill paid. A "bill" is defined as a request for payment from or on behalf of a beneficiary as the result of services provided by a single physician or supplier.

THE MEDICAL INSURANCE SAMPLE

Although the payment record provides a rapid method for summarizing payment data, it does not provide specific data on diagnoses, procedures, and related charges.

Basic statistics on the utilization of physician and other services covered under the supplementary medical insurance program are derived from bills paid by intermediaries to or on behalf of a basic one-percent sample of SMI enrollees and a supplemental sample of 4 percent of enrollees receiving services as hospital inpatients. Carriers have been given specific combinations of digits of the health insurance claim number to be used in selecting the samples, which are subsamples of the 20-percent sample used for hospital insurance program data.

Bills are submitted either directly on an SSA request for payment form, or on the SSA form in combination with the physician's own billing form. Both methods are designed to provide information on the date and place of each service, the procedure carried out or service provided, the condition treated (diagnosis), and the physician's or supplier's charge for specific services.

All of the bills of persons in the sample to or for whom payment is made under the program including those used to meet the annual \$50 deductible, are included in the sample and coded. However, data are not available through these procedures for persons in the sample who do not meet the \$50 deductible. Such data are collected by means of the Current Medicare Survey, with data made available in a separate report series.¹

Characteristics of the Enrolled Population, 1972

ON JULY 1, 1972, 21.3 million persons aged 65 and over were insured under Medicare. Almost all of these people, 20.1 million persons or 94 percent of the total were covered by both hospital (HI) and supplementary medical insurance (SMI). An additional 980,000 persons were entitled only to HI benefits and 217,000 were protected only by SMI (table A). This report presents data on the characteristics of the population in the Medicare program in 1972, and discusses changes in enrollment since the start of the program on July 1, 1966. The general tables present data by type of coverage and age, race, sex and by State and county of residence. Most of the counts of enrollees refer to July 1, 1972, to provide a population base for measures of utilization of medical care services under the Medicare program. Also included are tables showing enrollment by month, and the total number of persons enrolled at any time during 1972.

During the 6-year period from 1966 to 1972, HI enrollment increased 10.7 percent (from 19.1 million to 21.1 million) reflecting the growth of the population aged 65 and over. Almost every aged person is eligible for HI, but enrollment in the SMI program is voluntary and the enrollee is required to pay a premium.¹ There were 20.4 million SMI enrollees on July 1, 1972, or 14.7 percent more than when the program began. The number of persons entitled only to HI benefits decreased from 1968 to 1970 and then went up in 1971 and 1972. This rise was caused by an increasing number of persons entitled to HI but ineligible for SMI because of the 3-year enrollment or reenrollment limit (see Provisions of the Law).²

¹ For estimates of the number of aged not covered by Medicare, see U.S. Bureau of the Census, Census of Population and Housing: 1970 Evaluation and Research Program PHC(E)-4, "Estimates of Coverage of Population by Sex, Race, and Age: Demographic Analyses" (Washington, D.C.: U.S. Government Printing Office, 1973).

HI Enrollment

Type of entitlement.—Persons enrolled in the HI program may be described by the characteristics recorded in the Health Insurance Entitlement (HIE) master file—age, race, sex, place of residence, and type of entitlement. About 93 percent of the persons entitled to HI benefits were receiving or were eligible for social security benefits (table B), and 4 percent were receiving or were entitled to railroad retirement benefits. Some 299,000 persons were entitled to both social security and railroad retirement cash benefits because of earnings under both programs. These persons are reported both as entitled to social security benefits and as entitled to railroad retirement benefits, but are counted only once in the figures in table B for all enrolled persons. The balance of the enrolled population (5 percent) were not entitled to receive cash benefits under either social security or railroad retirement, and are classified as "other enrolled persons." This group is entitled to HI coverage under the transitional provision of the law. Under this provision, persons attaining age 65 need not be fully insured for social security but must have a specified number of quarters of covered employment to be eligible for HI. For persons who attained their 65th birthday before 1968, no quarters of coverage were required; in 1968, 3 quarters; in 1969, 6; in 1970, 9; in 1971, 12; and in 1972, 15. By 1974 for women and 1975 for men, the HI transitional provision will no longer apply since the same number of quarters of coverage will be required for entitlement to cash retirement benefits and HI benefits.

² The 1972 Amendments (Public Law 92-603) eliminated this provision of the law and provides new opportunities for persons formerly ineligible for SMI to enroll.

¹ Persons entitled to social security and railroad retirement cash benefits (299,000) are counted separately but only once in total.

The steady decline in the number of "other enrolled persons" from 1.5 million on July 1, 1967, to 1.0 million by July 1, 1972, resulted primarily from the number of deaths exceeding new enrollments in this group. Thus, the number of new enrollments fell from 122,000 in 1968 to 16,000 in 1972. The decline reflects the requirement that the newly enrolled acquire a greater number of work credits each year beginning with those who attained age 65 in 1968.

Except for the proportion of persons with race not reported, there were only minor differences between the characteristics of railroad retirement beneficiaries and social security beneficiaries (table B). Race was not reported for 14 percent of the railroad retirement beneficiaries in contrast to 1 percent for social security beneficiaries. Persons classified as "other enrolled," however, had a relatively high proportion (73 percent) of women, of persons 80 years and over (34 percent) and of persons reported as members of "all other races" (18 percent).

Age, race, sex.—There were more women enrolled in HI than men at every age and the ratio of women to men increased with advancing age because of their greater longevity (table B). A secondary factor is the declining proportion of foreign born in the population 65 years and over. The majority of immigrants who came to the United States in the 1880's to the 1920's were men and those surviving are mainly 65 years of age and over.³ At ages 65–66, 54 percent of the HI population were women. This proportion rose to 67 percent at ages 85 and over. The rising proportion of women to men with advancing age was similar for both the white population and among those of all other races. The group for whom race was not reported contained a much higher proportion of women (71 percent) than the total HI population (59 percent).

³ U.S. Bureau of the Census, *Current Population Reports*; "Estimates of the Population of the United States, by Age, Sex, and Race: April 1, 1960 to July 1, 1973." P-25, No. 519, P. 6 (Washington, D.C.: U.S. Government Printing Office, March 1974).

Among those without a race designation, at ages 65–66, 52 percent were women but this figure rose steeply to 88 percent at ages 85 and over (table B).

The median age of the white population was slightly higher (0.4 years) than that for all other races. The greater longevity of women raised the median age of women 1.1 years above that of men. By race, 90 percent of the enrolled population was classified as white; 8 percent as all other races; and for 2 percent race was not reported.

Geographic distribution.—For the HI population, the most populous region was the South (31 percent) while the West had the smallest proportion (16 percent) of HI enrollees (table C). By division, the greatest proportion of the HI population resided in the Middle Atlantic and the East North Central States, with each having nearly 20 percent of all HI enrollees. The Mountain States had the smallest percentage of HI enrollees (4 percent). The same distribution held for the white population, but for persons of all other races, almost 60 percent lived in the South.

With the exception of the South, the proportion of whites exceeded 91 percent of total HI enrollees in all geographic divisions. In the three divisions of the

South, the white population accounted for between 79 and 84 percent of HI enrollees.

Two-thirds of the persons covered by hospital insurance were living in a metropolitan county. The proportion of those living in metropolitan counties showed much variation by geographic area. Nearly half the population of the South lived in non-metropolitan counties while in the Northeast less than 20 percent of the population lived in counties of this type. Nearly three-quarters of the HI enrollees who lived in a metropolitan county resided in the standard metropolitan statistical areas having a population of 500,000 or more in 1970 (table 2.4).

SMI Enrollment

Age, race, and sex.—There was little difference in the distribution by race, sex, and median age of persons enrolled under the HI and the SMI program. This is to be expected since the proportion of HI enrollees also participating in SMI was 95 percent (table D). When Medicare began, only a small number of persons were eligible for SMI but not for HI (table A). The number of SMI enrollees expressed as a propor-

tion of the number of HI enrollees, therefore, provided an adequate measure of participation in the voluntary part of the program. However, as the number of persons enrolled in SMI but not eligible for HI increased, enrollment in both HI and SMI as a proportion of HI enrollment has been computed as a more accurate indicator of SMI coverage.

The largest difference in the proportion of the HI population also enrolled in SMI was between races. For the white population, 96 percent of the persons enrolled for HI were also enrolled for SMI, about 6 percentage points more than for all other races. The excess for whites persisted in every age and sex group and was greatest for those aged 65–69. The percentage of HI enrollees also covered by SMI varied only slightly with sex, the participation of women being greater than that of men by about one percentage point. For 2-year age groups between 65 and 75, the lowest proportion was recorded for men at ages 65 and 66. It is likely that many men on attaining age 65 do not enroll for SMI because they are protected by employment-related medical insurance. By 5-year age groups the lowest and highest participation rates differed by only 1 percentage point.

Geographic distribution.—On July 1, 1972, among HI enrollees residing in the United States 97 percent were also enrolled in SMI (table E), or 1 percentage point higher than for all persons covered by HI. The lower rate among the total population resulted from the inclusion of two groups of SMI-eligible persons with low participation residing in outlying areas such as Puerto Rico (see table 2.1) and in foreign countries. Medicare benefits are not ordinarily paid for services provided in foreign countries. Participation rates were much lower than the U.S. average in every outlying area. Factors such as lower incomes and differing arrangements for medical care in these areas probably account for the lower enrollment.

For all persons in the United States, the percent of HI enrollees with SMI benefit coverage varied only about 1 percentage point among the divisions, from 96 percent in the West South Central States to 97 percent in the New England States. Among all other races this proportion varied by 10 percentage points

from 85 percent in the Mountain States to 95 percent in the Pacific States. There was no difference in the proportion of HI enrollees with SMI coverage (98 percent) according to metropolitan-nonmetropolitan county of residence.

Persons Newly Enrolled and Persons Terminated in 1972

A total of 1,555,000 persons was newly enrolled under HI during 1972 (table F), an average of 130,000 a month. Nearly all additions to the rolls were persons who had just attained age 65. The provisions of the law for HI coverage also permit additions to

the rolls at older ages. If a person files his application after he attains age 65, his HI protection can be retroactive for up to 12 months prior to the date he filed his application. Additions to the SMI program totaled 1,610,000 persons, exceeding the number of those newly enrolled for HI by 55,000 persons. Additions to the SMI rolls were higher than for HI as a result of three factors: the general enrollment period, the State buy-in program, and the enrollment of persons in SMI who are ineligible for HI coverage.

The general enrollment period.—Persons who fail to enroll during their initial enrollment period are given additional opportunities to do so during the annual general enrollment periods (see Provisions of

the Law). In the general enrollment period (GEP) which ran from January 1, 1972 to April 1, 1972, over 260,000 persons were identified as eligible to enroll. About 80,000 chose to do so with enrollment taking effect on July 1, 1972.

The premium paid by persons enrolling for SMI was \$5.80 a month on July 1, 1972. In addition, the monthly premium of persons who do not sign up in their initial enrollment period is increased by 10 percent for each full 12 months in which they could have but did not enroll. The increase also applies to persons reenrolling 12 or more months after their first coverage was terminated. About 63 percent of those who enrolled during the 1972 GEP were subject to a 10 to 40 percent surcharge, or premium payments ranging from \$6.40 to \$8.10 a month.

"SMI only" enrollees.—The second group adding to SMI enrollment are those persons ineligible for HI coverage. There were 217,000 such persons on July 1, 1972, an increase of 44,000 persons since July 1, 1971. They were persons who lacked the required work credits for HI eligibility, including 28,000 active or retired Federal employees insured under the Federal Health Benefits Act of 1959, who may pay the premium to enroll for SMI but who are not entitled to HI. As expected, enrollees eligible only for SMI differed considerably from those protected by both parts of Medicare. "SMI only" eligibles are mainly new enrollees who lacked the work credit requirements that began for those reaching age 65 in 1968 or later. Thus, 96 percent of those eligible only for SMI were less than 75 years of age compared to 60 percent of those covered by both programs. Because women are more likely to lack the work credit requirement they comprised about 70 percent of SMI only eligibles while they were 60 percent of those covered by both programs. By race, SMI only eligibles contained higher proportions of persons of all other races, 14 percent, and persons classified race unknown, 10 percent; for those having both HI and SMI coverage the proportions were 8 and 2 percent, respectively. The distribution of enrollees eligible only for SMI by age, race, and sex is:

[In thousands]

State "buy-in" agreements.—The third group adding to the rise in SMI enrollment resulted from the

"buy-in" provisions of the law. At the start of Medicare, 22 States elected to enroll and pay premiums for aged persons who receive cash payments under public assistance programs. Public Law 90-248 extended eligibility effective April 1, 1968, to those who qualify for medical assistance programs. By January 1, 1970, the closing date for requesting this arrangement, 46 States, the District of Columbia, Guam, and the Virgin Islands had signed buy-in agreements for particular categories to public assistance. No additional States or areas were added to the buy-in rolls since then (table G). However, Maryland joined 26 States and two areas that extended buy-in coverage to aged "medical indigents" eligible for medical assistance (Title 19). The medically indigent have income and assets larger than that required for public assistance but inadequate to pay their medical expenses. As of July 1, 1972, there were 2.1 million or 11 percent of all SMI enrollees protected under State buy-in agreements (table H). The highest proportions of buy-ins in the U.S. were in six southern States: Mississippi, Alabama, Georgia, Arkansas, Texas, and Oklahoma. These States each paid premiums for one-fifth or more of their SMI enrollees.

The age, sex, race, and residence of buy-ins differed considerably from total SMI enrollees. Thus 53 percent of buy-ins were 75 years and over compared with 40 percent of all SMI enrollees. Nearly 70 percent of buy-ins were women while among total SMI enrollees women were about 60 percent. Buy-ins of races other than white were three times the proportion of total SMI beneficiaries (24 versus 8 percent). Or stated another way, one-third of all SMI enrollees classified as members of all other races were buy-ins while the comparable proportion among whites was only nine percent. Nearly three-quarters of the buy-in population lived in the South and West while among all persons with SMI coverage less than half were from these two regions. The distribution of buy-ins and total SMI enrollees is:

Age, sex, race, and area of residence	Total SMI enrollment		State buy-ins

¹ PA recipients entitled to OASDHI and RRB were covered under State “buy-in” agreements, except in Mass. and Wis. Coverage was effective July 1, 1966, except in Calif. and Guam where coverage of beneficiaries began Jan. 1, 1967, and July 1, 1968, respectively.

² Definition of title number: 1—old-age assistance; 4—aid to families with dependent children; 10—aid to the blind; 14—aid to permanently and totally disabled; and 16—aid to aged, blind, or disabled.

³ Title 4 covered in Ark. effective Jan. 1, 1970; Fla., Feb. 1, 1970; Maine, Apr. 1, 1968; and Okla., Nov. 1, 1967.

⁴ Titles 4, 10, and 14 covered in Del. effective May 1, 1968; Iowa, July 1, 1967; New Jersey, Jan. 1, 1970; S. Dka., Jan. 1, 1968; Tenn., Dec. 1, 1969; Va., Sept. 1, 1969; and Wis., Apr. 1, 1968.

⁵ Nevada does not have a title 14 program.

through November 1972. During 1972, HI coverage was terminated for 1.2 million persons who died (table J).

In calendar year 1972, 1,240,000 deaths were recorded among Medicare (HI and/or SMI) enrollees. Owing to differences in the population covered, and in the sources of the report of age at death, as well as delays in recording deaths in the Social Security Administration’s file, these figures do not correspond exactly to data on deaths published by the National Center for Health Statistics.

¹ Based on data recorded August 13, 1973. State of residence is not necessarily State that bought coverage.

Table J.—Persons whose health insurance was terminated during 1972 by race, sex, and reason for termination

Race and sex	Termination by death			Other supplementary medical insurance terminations
	Hospital and/or medical insurance	Hospital insurance	Supplementary medical insurance	
All persons—	1,237,847	1,231,483	1,188,568	34,746
Men—	630,082	627,255	601,406	16,391
Women—	607,765	604,228	587,162	18,355
White—	1,099,662	1,094,939	1,059,345	25,438
Men—	566,926	564,731	543,265	12,282
Women—	532,736	530,208	516,080	13,156
All other races—	100,793	99,772	93,645	7,281
Men—	53,077	52,670	48,734	3,564
Women—	47,716	47,102	44,911	3,717
Race unknown—	37,892	36,772	35,578	2,027
Men—	10,079	9,854	9,407	545
Women—	27,313	26,918	26,171	1,482

Of persons entitled to HI, the death rate among all aged persons of races other than white (58.9 per 1,000 enrolled for HI on July 1, 1972) was slightly higher than that of whites (57.8). This held true for those aged 65–79 but for those 80 years and over the death rate of whites exceeds that of all other races, as shown below:

Age	Deaths of HI enrollees per 1,000 enrolled for HI	
	White	All other races
All persons—	57.8	58.9
65–69—	26.9	34.4
70–74—	41.2	48.2
75–79—	63.2	68.9
80–84—	98.2	95.0
85 and over—	175.6	142.4

About 1,225,000 persons were terminated from SMI in 1972, 97 percent as a result of death. Only 35,000 of the 20.4 million persons enrolled for SMI withdrew from the program either by notifying the Social Security Administration or by not paying the premium. While over 97 percent of the terminations for white persons were a result of death, 93 percent of the terminations for all other races resulted from death and the remaining 7 percent withdrew.

Enrollment Growth, 1966-1972

Both HI and SMI enrollment have increased in each of the 6 years of the Medicare program. Enrollment in the HI program grew from 19.1 million in 1966 to 21.1 million in 1972, because persons aging into the program exceeded enrollees that died. SMI enrollment grew from 17.7 million in 1966 to 20.4 million in 1972. Nearly all persons 65 years and over are entitled to HI, while persons voluntarily enroll for SMI and must

pay a premium. These factors account for differences in the size and the rate of growth of the two programs. Annual increases in HI enrollment ranged from 1 to 2 percent (table K), while for SMI enrollment increases ranged from 1 to 5 percent (table L). The jump in SMI enrollment from 1 percent between 1966 and 1967 to 5 percent between 1967 and 1968 was caused by the first general enrollment period which took effect on July 1, 1968. Since then, SMI enrollment has increased by 2 percent annually.

Hospital insurance.—Because women live longer than men, the sex characteristics of the Medicare population changed slightly in the first 6 years of the program. Between 1966 and 1972 the increase of HI enrollees was greater for women (13 percent) than for men (8 percent). As a result, the proportion of women to total enrollees increased slightly, as shown below:

Year	Men	Women
1966—	42.6	57.4
1967—	42.3	57.7
1968—	42.1	58.0
1969—	42.0	58.0
1970—	41.8	58.2
1971—	41.6	58.4
1972—	41.4	58.6

This change reflected primarily the relative growth in the number of women in the group aged 75 and over. Among those entitled to HI benefits in that group, the proportion that were women went from 60.1 percent to 62.6 percent, as shown by the following figures.

Age and sex	Percentage distribution of HI enrollment						
	1966	1967	1968	1969	1970	1971	1972
Under 75—	100.0	100.0	100.0	100.0	100.0	100.0	100.0
Men—	44.2	44.0	44.0	44.1	44.1	44.1	44.1
Women—	55.8	56.0	56.0	55.9	55.9	55.9	55.9
75 and over—	100.0	100.0	100.0	100.0	100.0	100.0	100.0
Men—	39.9	39.4	39.1	38.7	38.2	37.9	37.4
Women—	60.1	60.6	60.9	61.3	61.8	62.1	62.6

The 11 percent growth in enrollment in the 6-year period varied by age and sex (figure 1). The proportion of women aged 75–79, 80–84, and 85 and over increased from 1966 to 1972 and decreased for ages 65–69 and 70–74. Among men, those in the age groups 80–84 and 85 and over increased while those aged 75–79 remained unchanged. Among men below age 75 the proportion 70–74 years old decreased while those 65–69 increased. These changes in the age distribution raised the proportion of persons aged 75 and over to the total HI population from 37 percent in 1966 to 40 percent in 1972. And the change in the sex distribution in the first 6 years of the program among those 75 years and over, increased the HI enrollment of women (24 percent) or double that of men.

Enrollment among persons of all other races increased at a faster rate than among whites between 1966 and 1971. In 1972, the rate of increase of whites

exceeded that of other races. As a result, the ratio of all other races to total enrollment declined slightly for the first time since Medicare began. The percentage distribution of HI enrollment by race follows:

Year	All persons	White	All other races	Race unknown
1966-----	100.0	89.3	7.6	3.1
1967-----	100.0	89.2	7.7	3.1
1968-----	100.0	89.2	7.7	3.1
1969-----	100.0	89.2	7.8	3.0
1970-----	100.0	89.3	7.9	2.8
1971-----	100.0	89.6	8.1	2.4
1972-----	100.0	89.6	8.0	2.3

The greater longevity of women was again evident as the increase in enrollment among women was much larger than that of men for both white persons and those of all other races.

Changes in enrollment by geographic region depend not only on the number of persons aging into the program and the number of deaths among those aged 65 and over, but also on interstate migration of Medicare enrollees. About 1 percent of all persons 65 years and over migrate between States in a year, chiefly from the Northeast and North Central States to the South.⁴

All four regions showed annual increases from 1966 to 1972 in the number of persons entitled to HI benefits. The South had the largest numerical growth (915,000) and the highest relative increase (17 percent). Next was the West with an enrollment gain of 430,000 or 15 percent. The North Central and Northeastern States had smaller increases, 6 percent and 5 percent respectively. These differences in enrollment growth during the period reported raised the South above the North Central States as the most populous region among persons aged 65 and over beginning in 1968.

Enrollment increased also in each of the 50 States between 1966 and 1972. The largest 6-year numerical rise was in Florida (297,000), and accounted for nearly one-third of the growth of enrollment in the South. Much of Florida's growth probably came from the migration of the elderly from the Northeast and North Central States.⁵ Five other States below Florida in numerical growth between 1966 and 1972 were: California, 229,000; Texas, 149,000; New York, 72,000; Pennsylvania, 72,000; and North Carolina, 64,000. These six States comprised nearly 46 percent of the growth in HI enrollment between 1966 and 1972 but represented only 37 percent of the HI population in 1972. The District of Columbia had a 3 percent decline in enrollment probably caused by the migration of the elderly.⁵ The Bureau of the Census also

reported that for all persons 65 years and over the District of Columbia had a net outmigration between 1965 and 1970.⁶ A distribution of percentage changes in enrollment between 1966 and 1972 for the 50 States and the District of Columbia are shown below:

Percentage change in enrollment, 1966-1972	Number of States ¹	
	Hospital insurance	Supplementary medical insurance
Total-----	51	51
-5.0 to 0.0-----	1	—
0.0 to 4.9-----	4	1
5.0 to 9.9-----	20	10
10.0 to 14.9-----	15	15
15.0 to 19.9-----	5	11
20.0 to 24.9-----	—	7
25.0 to 29.9-----	3	1
30.0 to 34.9-----	—	3
35.0 to 39.9-----	1	—
40.0 to 44.9-----	2	1
45.0 to 49.9-----	—	2

¹ Includes District of Columbia.

Migration of persons 65 and over may be seen by comparing enrollment in SMSA's that, according to the Bureau of the Census, have experienced large net in-migration or out-migration between the 1960 and 1970 Censuses. The migration of persons 65 years and over to metropolitan resort or retirement areas as reported by the Bureau of the Census is reflected in the large increases (19 to 63 percent) in HI enrollment between 1966 and 1972 in the nine areas in Arizona, California, and Florida shown below. Enrollment in SMSA's with sizeable out-migration indicates that the movement of migrants is from large metropolitan areas in the North. In 6 years, changes in HI enrollment varied from minus 3 percent to plus 8 percent in the 12 SMSA's with the largest out-migration according to the Bureau of the Census.

Virtually all of the increase in the HI population between 1966 and 1972 occurred in metropolitan counties (table K).

Changes in SMI enrollment.—The increase in enrollment in SMI for the 1966-72 period was nearly 1.4 times greater than for HI.

As a result the proportion of the HI population also enrolled in SMI increased from 92.8 percent in 1966 to 95.4 percent in 1972 (table M). This ratio declined in 1967 because there was no general enrollment period. The ratio increased in 1968 and again in 1969 but has remained virtually unchanged since then.

When Medicare began, the proportion of the HI population also enrolled in SMI was 93.4 percent among white persons and 87.4 percent among persons of all other races or a difference of 6.0 percentage points (table M). In 1967, SMI enrollment among whites increased while enrollment for all other races

⁴ U.S. Bureau of the Census, *Current Population Reports*, "Mobility of the Population of the United States, March 1970 to March 1971." P-20, No. 235 (Washington, D.C.: U.S. Government Printing Office, April 1972).

⁵ William J. Nelson, "Interstate Migration of Aged Beneficiaries." Social Security Administration, Office of Research and Statistics, *Research and Statistics Note No. 3*, February 25, 1970. The study refers only to those aged Social Security beneficiaries receiving benefits on June 30, 1967. Unpublished tables for beneficiaries receiving benefits on June 30, 1970, June 30, 1971, and June 30, 1972, show similar trends.

¹ Consists of 50 States, District of Columbia, and residence unknown.

enrollment among all other races has exceeded that of whites, so that the difference in participation rates by race has narrowed to less than 6 percentage points.

Regional differences in the proportion of HI enrollees also participating in SMI declined in 1968 and has almost disappeared since then. The figures ranged from 96.7 percent in the North Central and Western States to 95.9 in the South. The participation rate among women continued to be a little above that for men.

Figure 1.—Percentage distribution of Medicare enrollees, by age and sex, 1966 and 1972

The HIE master file.—The data on age, sex, race, and place of residence of the enrolled population in this report are from the health insurance entitlement (HIE) master file. Changes or corrections in the characteristics of the beneficiaries, new enrollments, and terminations are entered into the file at periodic intervals. Data for 1972 are from the HIE master file summarized on April 1, 1973.

Place of residence.—The beneficiary's place of residence is defined as his mailing address. This mailing address is not necessarily his actual place of residence. For example, some beneficiaries have their checks mailed to a bank, a post office, or to a representative payee in a State or county which may differ from the residence of the beneficiary. Temporary or permanent changes in address are shown as enrollees report them to SSA. Only the current mailing address is kept in the HIE master file and that address is classified as the place of residence. The address in the file on the date of tabulation is used for all tables.

Residence unknown.—There were 16,000 people with unknown residence recorded in the HIE file in 1972 (table 2.6). Most of these entries were the result of processing errors with respect to codes for States or foreign countries. In addition, the number of enrollees whose county of residence was unknown appears in table 2.3 for each State. These were addresses from which the county could not be determined or possibly processing errors.

Race unknown.—On July 1, 1972, the number of HI enrollees without a race designation was 493,000, about the same as the previous year. The relatively high proportion of persons without a race designation among RRB enrollees is due to unresolved data exchange procedures between the SSA and the RRB. The master records of the Board do not contain a race designation. At the start of the Medicare program and at the request of the SSA, the Board gave Medicare race information. Since then the Board has not provided the race of railroad retirement beneficiaries newly enrolled in the Medicare program. Changes in HI enrollment by type of entitlement among persons classified as race unknown between 1971 and 1972 are shown below:

Type of entitlement and sex	[In thousands]		Increase, 1971–1972
	1971	1972	
Total race unknown ¹	489	493	4
Men	131	143	12
Women	358	349	–8
Entitled to RRB	95	119	24
Men	46	61	15
Women	48	58	9
Entitled to social security	223	216	–7
Men	45	46	1
Women	178	170	–8
Other enrolled persons	172	159	–13
Men	40	36	–4
Women	132	123	–9

¹ Persons entitled to social security and railroad retirement benefits are counted in each category separately, but only once in total.

Persons enrolled as of July 1, 1972.—Enrollment as of July 1 has been chosen as the population base for utilization rates to be published in other sections of the annual statistical report series. The choice was based on the similarity of July 1 enrollment to a 12 month average enrollment. A comparison of HI enrollment by age, race, and sex on July 1, 1972, with

an average of 12 monthly enrollment figures in 1972, computed from table 2.5, showed remarkable similarity. Less satisfactory was SMI enrollment for July, which was consistently higher than the 12 month average enrollment. This difference resulted from additions to the rolls on July 1 of persons who requested coverage during the general enrollment pe-

riod. However, deriving a monthly average enrollment from a fixed date of tabulation involves a possible understatement of the number enrolled since enrollment data are less complete in the months closest to the date of tabulation. The difference between the July 1 figure and the "true" monthly average may be less than that observed in the present data.

Provisions of the Law and Regulations

The Medicare program, enacted on July 30, 1965 as Title XVIII of the Social Security Act, became effective on July 1, 1966. The program makes available two separate but coordinated insurance coverages—hospital insurance, covering nearly all persons aged 65 and over, and supplementary medical insurance, covering those persons in this age group who enroll voluntarily and pay the premium. The law was amended during each year 1966-1968, and again in 1972.¹ In particular, the 1972 amendments enacted on October 30, 1972 made numerous important changes in the Medicare program. Changes which became effective prior to January 1, 1973, and which affect the data contained in this report are described below.²

Hospital Insurance Program

The hospital insurance (HI) program pays for part of the costs of inpatient hospital care and related health care services provided by skilled nursing facilities (formerly termed extended care facilities) and home health agencies following a period of hospitalization. For the services to be covered, they must be provided by institutions and organizations which have been certified as qualified providers of services and which have signed an agreement to participate in the program.³ An exception exists under special provisions for hospitals certified to provide only emergency services.

The law provides maximum limits on the services which may be covered under the HI program. These limits are based on the concept of a "benefit period." A benefit period begins with the first day of hospitalization and ends when the individual has not been a bed patient in a hospital or skilled nursing home for 60 continuous days.

¹ P.L. 89-384 enacted April 8, 1966.
P.L. 89-713 enacted November 2, 1966.
P.L. 90-97 enacted September 30, 1967.
P.L. 90-248 enacted Jan. 2, 1968.
P.L. 92-336 enacted July 1, 1972.
P.L. 92-603 enacted Oct. 30, 1972.

² For further information about Public Law 92-603, see *Summary of Social Security Amendments of 1972*, a joint publication of the Committee on Finance, U.S. Senate, and Committee on Ways & Means, U.S. House of Representatives, Nov. 17, 1972.

³ For certification requirements see SSA, Office of Research and Statistics, Medicare: *Health Insurance for the Aged, 1968, Section 3: Participating Providers* (Washington, D.C.: U.S. Government Printing Office, 1971).

BENEFITS

Inpatient hospital benefits.—Covered hospital services include room and board in accommodations containing from two to four beds, nursing services (except for private duty nursing), drugs and biologicals, and all those services ordinarily furnished by a hospital to its inpatients. The program does not cover the services of physicians (including staff radiologists, anesthesiologists, pathologists and physiatrists) except for services provided by interns or residents under approved teaching programs.

Requirements for payment by the individual of an inpatient hospital deductible and coinsurance amounts also are established by law. The Secretary of Health, Education and Welfare is required to determine the deductible amount between July 1 and October 1 of each year with the new deductible applicable during the succeeding calendar year. The amount must be computed by multiplying the ratio of the current average hospital per diem rate (under the program) to the per diem in 1966 by \$40, and rounding the amount to the nearest multiple of \$4. The inpatient hospital coinsurance amount must equal 1/4 of the deductible (1/2 of the deductible for lifetime reserve days) and the coinsurance for skilled nursing facility services must equal 1/8 of the deductible.

The program pays for the "reasonable costs" of covered services in a participating hospital for up to 90 days in a "benefit period." Full payment is made for the first 60 days of hospitalization less the deductible of \$68 for services received in benefit periods starting in 1972. For each of the remaining 30 days in the benefit period, the patient pays a coinsurance amount of \$17 a day.

Each hospital insurance beneficiary also has a "lifetime reserve" of 60 additional hospital days which can be used at his option whenever he has exhausted the 90 days covered in a benefit period. Lifetime reserve days are subject to a copayment of \$34 a day.

The cost of the first three pints of blood (or equivalent amounts of packed red blood cells) furnished a patient during a benefit period is also deductible unless the patient arranges for replacement. Charges for any additional blood are covered under the program.

The program also pays for emergency services in a nonparticipating hospital. Each nonparticipating hospital providing emergency services elects whether to

claim payments from the Medicare program for emergency services rendered beneficiaries in a given year. If the hospital elects to bill the program, reimbursement is made as described above. In other cases, the beneficiary claims direct payment and submits the itemized bill to Social Security Administration. In this case, reimbursement is based on reasonable charges for covered services and amounts to 60 percent of reasonable charges for room and board plus 80 percent of such charges for ancillary services. Payment is subject to the deductible and coinsurance provisions of the law.

Hospital insurance benefits also include reimbursement for inpatient tuberculosis and psychiatric hospital services. However, there is a lifetime limit of 190 days of care in a psychiatric hospital. Where an individual is a patient in a participating psychiatric hospital at the time he becomes entitled to hospital insurance, the number of days he was such an inpatient in the 150-day period immediately prior to his eligibility are deducted from his days of entitlement to inpatient psychiatric care in that benefit period but not from the lifetime limitation.

Skilled nursing facility benefits.—Covered extended care services furnished by a skilled nursing facility may include nursing care; bed and board; physical, occupational or speech therapy; drugs and biologicals; medical services of an intern or resident-in-training of a hospital having a transfer agreement with the skilled nursing facility; and other necessary health care services generally provided by such facilities.

The program pays for the reasonable costs of all covered inpatient services in participating skilled nursing facilities for up to 100 days in a benefit period. Benefits are payable only following discharge from a hospital after a stay of 3 consecutive days or more; and prior to the 1972 amendments, admission to the facility had to occur within 14 days of hospital discharge. With the enactment of the amendments on October 30, 1972, there may be exceptions when the patient's condition or a shortage of beds affects the admission date. Full payment is made for the first 20 days. For each of the remaining 80 days, the patient pays a coinsurance amount of \$8.50 a day (one-eighth of the inpatient hospital deductible) as required by law.

Post-hospital home health benefits.—Covered home health services may include part-time or intermittent nursing care; physical, occupational or speech therapy; part-time or intermittent services of a home health aide; medical supplies (other than drugs and biologicals) and the use of medical appliances; and, in certain cases, services of an intern or resident-in-training of a teaching hospital. The services must be furnished by or under arrangements of an approved home health agency.

Coverage under HI provides for payment of the reasonable cost of up to 100 home health visits after the beginning of one benefit period and before the beginning of the next. In addition, the visits must occur in the year following a beneficiary's most recent discharge from a hospital stay of at least 3 consecutive days or

from a covered stay in a skilled nursing facility. A home health plan must be established by the patient's physician within 14 days after the hospital or ECF discharge. The home health services must be necessary for further treatment of a condition for which the patient received services in the hospital or skilled nursing facility.

Supplementary Medical Insurance Program

The supplementary medical insurance (SMI) program provides coverage for a variety of medical services and supplies furnished by physicians or others in connection with physicians' services; outpatient hospital services; and home health services. Individuals 65 years of age and over may enroll in the program regardless of whether they are eligible for monthly social security benefits. Premiums are paid by or on behalf of all enrollees, and are matched by the Federal Government from general revenues.

BENEFITS

Physicians' services covered under the program include home, hospital, and office visits. The program also pays for other services and supplies, such as: drugs and biologicals that cannot be self-administered, if they are furnished as a part of a physician's professional service; diagnostic X-ray tests, diagnostic laboratory tests, and other diagnostic tests; X-rays, radium, and radioactive isotope therapy, including materials and the services of technicians; surgical dressings, splints, casts, and other devices used for reduction of fractures and dislocations; purchase or rental of durable medical equipment such as oxygen tents, hospital beds, and wheel-chairs used in the patient's home (including an institution used as his home); ambulance service where the use of other methods of transportation is contraindicated by the individual's condition; prosthetic devices (other than dental) that replace all or part of an internal organ; leg, arm, back, and neck braces; artificial legs, arms, and eyes, including replacement if required because of a change in the patient's physical condition; and home health visits provided by a certified home health agency in accordance with a home health plan established by the patient's physician (no prior hospitalization is necessary). Payment may be made for up to 100 home health visits in a calendar year without regard to similar services received under the HI program.

Also covered are hospital services incident to physicians' services rendered to outpatients, and outpatient physical therapy services.

In each calendar year through 1972 a deductible of \$50 must be satisfied before payment may be made under the SMI program (with two exceptions noted below). Bills count toward the deductible on the basis

of incurred rather than paid expenses; only charges allowed under the program count towards the deductible. To preclude the possibility of a beneficiary having to meet a deductible twice in a short period of time a "carry-over" provision is applied. Accordingly, covered expenses incurred in the last quarter of the year and applied to the deductible in that year are also credited toward the deductible for the following year.

After the deductible has been met, the SMI program pays for 80 percent of the allowed (reasonable) charges for covered physician services and most other medical services. However, deductible and coinsurance requirements do not apply to the services of radiologists and pathologists furnished to hospital inpatients. "Reasonable" charges for such services are completely reimbursed. Where an independent laboratory bills patients directly and accepts assignment, the Secretary is authorized to negotiate a payment rate with the laboratory for the diagnostic tests it provides Medicare beneficiaries (effective October 30, 1972). Reimbursement on assigned bills is made at 100 percent of the negotiated rate; the deductible and coinsurance requirements do not apply. Hospital services incident to outpatient care, and home health services are subject to the deductible and are reimbursed on the basis of 80 percent of reasonable costs.

The law sets special limits on the payment which may be made for outpatient treatment of mental illness; recognition of incurred expenses is limited to the lesser of \$312.50 or 62.5 percent of actual expenses in a calendar year. Since only 80 percent of allowed charges may be reimbursed, the effect is to limit payment to \$250 or 50 percent of the allowed charges in any year after the deductible has been met, whichever is less.

Eligibility

Hospital Insurance.—Almost all persons aged 65 and over are eligible for benefits under the hospital insurance program. Included are those persons who are entitled to monthly social security cash benefits or payments from the railroad retirement system. Further, a special transitional provision provides eligibility for certain persons who do not qualify for monthly cash benefits on the basis of their own wage record or as a dependent or survivor of an insured worker. The provision applies, generally, to a person aged 65 or over who (1) attained age 65 before 1968 or (2) attained age 65 after 1967 with not less than three quarters of social security coverage, whenever acquired, for each calendar year elapsing after 1966 and before the year in which he attains age 65. For persons who reach age 65 after 1968, the amount of work credits (quarters of coverage) needed increases by three quarters each year—six quarters are needed by those who reached age 65 in 1969, nine by those who reached age 65 in 1970 and so on.

Federal employees who retired from the Federal service after July 1, 1960, and who had the opportunity

to be covered under the Federal Employees Health Benefits Act of 1959, are ineligible for hospital insurance benefits under the transitional provisions.

Also ineligible are aliens with less than 5 years of continuous residence in the United States, and those persons convicted of crimes against the security of the United States.

Hospital insurance protection can be retroactive for as many as 12 months before the month an individual files his application for entitlement. For example, an individual may apply 11 months after he attains age 65 and still be entitled to benefits from the month he attained age 65.

Supplementary Medical Insurance.—Persons entitled to benefits under the hospital insurance program, retired Federal employees, and persons not eligible for hospital insurance under the transitional provisions may voluntarily participate in the SMI program.

Enrollment.—Individuals may enroll in the SMI program only during specified periods—the initial and the general enrollment periods. The initial enrollment period begins with the third month preceding the one in which an individual attains age 65 and ends 3 months after the month of attainment, a total period of 7 months. If he enrolls during the 3 months prior to the month in which he attains age 65, his coverage is effective with the month in which he attains age 65; if he enrolls during the month he attains age 65, his coverage begins the following month; if he enrolls in any of the 3 months after he attains age 65, his coverage begins from 2 to 3 months after enrollment, depending on how long he waited before enrolling.

Beginning with 1969, there are general enrollment periods from January 1 through March 31 of each year for those who did not enroll in their initial enrollment period, or who previously terminated their enrollment and wish to re-enroll. For 1969 and later years, a person who enrolls during a general enrollment period is covered under SMI beginning with July 1 of the year in which he enrolls. Prior to the 1972 amendments, an eligible individual had to enroll within 3 years after the end of his initial enrollment period or within 3 years after termination of prior enrollment. The 3-year limitation is no longer applicable. Re-enrollment is allowed only once.

A State may enroll otherwise eligible individuals who receive cash payments under public assistance programs or are otherwise eligible for medical assistance under Title XIX if: a) prior to January 1, 1970 the State requested that a State-Federal enrollment agreement be established; and b) the State pays the necessary premiums.

Enrollment terminates with the beginning of the month following the month of death. Otherwise, social security and railroad retirement beneficiaries may give notice of their desire to withdraw from the SMI program at any time; their coverage is terminated at

the close of the following calendar quarter. Other enrolled persons may terminate their coverage by withholding payment of premiums or by notifying the Social Security Administration in writing of their desire to withdraw from the program. The enrollee is provided a 90-day grace period for the payment of overdue premiums after which coverage is automatically terminated. The 1972 amendments permit an additional 90-day extension when the enrollee has good cause for not paying the premium within the initial 90-day grace period.

Financing the Program

Hospital Insurance.—The hospital insurance program is financed primarily through a schedule of increasing tax rates on a portion of current earnings in employment covered under the Social Security Act. The maximum amount of annual earnings to which the rates are applied began at \$6,600 for calendar year 1966; it increased to \$7,800 effective with 1968 and \$9,000 effective with 1972. The 1972 amendments established an additional schedule of increases to \$10,800 for 1973, and \$12,000 for 1974 with future automatic increases as wages rise.

The same tax rate applies to employees, employers, and self-employed persons. The rate has been 0.60 percent for each year 1968-1972. The scheduled rate for 1973 through 1977 is .90 percent, and rates increase for future years up to 1.2 percent for 1993 and thereafter. The proceeds of this tax, and monies collected from the railroad retirement system (with respect to the coverage of railroad retirement beneficiaries) are placed in a Hospital Insurance Trust Fund from which reimbursement for all benefits and administrative expenses incurred under the hospital insurance program is made. The hospital insurance trust fund is reimbursed from general tax revenues for the cost of providing coverage for the persons who qualify for hospital insurance under the transitional provisions. For January, 1972 there were about one million such persons, a decrease from the 2.6 million who so qualified in 1966.

Supplementary Medical Insurance.—Premiums are paid into the Federal Supplementary Medical Insurance Trust Fund by those persons enrolled for supplementary medical insurance (or on their behalf), and a matching amount is paid by the Federal Government from general revenues. Benefits and administrative costs are paid from monies in the SMI Trust Fund.

The premiums of persons receiving social security cash benefits, railroad retirement, or Federal civil service annuities are deducted from their monthly benefit checks. Persons not receiving monthly benefits are billed quarterly for premiums by the Social Security Administration or the Railroad Retirement Board and have a 90-day grace period in which to make payment. Premiums may be paid for as long as a year in advance.

For individuals financially unable to make quarterly payments, arrangements can be made for monthly payments.

Amount of Premium.—The Secretary of HEW is directed by law to determine the SMI premium rate on an annual basis. The dollar amount is required to be sufficient to produce revenue equal to one half of the expected benefit and administrative costs payable under SMI during the period for which the premium rate applies. The rate is determined in December of each year and is applicable for 12 months beginning with the following July.

The premium rate in the first half of 1972 was \$5.60 per month. The rate was raised to \$5.80 effective July 1972.

Administration of the Program

Hospital Insurance.—Under the hospital insurance part of the program, groups or associations of providers, on behalf of their members, may nominate a national, State, or other public or private agency or organization to serve as intermediary in the claims process. A member of an association is free, however, to receive payment from an approved intermediary other than its association's nominee, if approved by the Secretary and agreeable to the intermediary selected. In addition, a provider may deal directly with the Social Security Administration.

The Secretary may enter into an agreement with a nominated organization if he finds this to be consistent with effective and efficient administration of the hospital insurance program. Under the agreement, the intermediary determines the provider's reasonable costs for items and services covered under the program; makes payment; and assists in the application of safeguards against unnecessary utilization of covered services. The agreement may also call for (1) furnishing consultative services to assist providers to establish and maintain necessary fiscal records and otherwise qualify as providers of services; (2) serving as a center for communicating with providers; and (3) making audits of provider records. Hospital insurance intermediaries also make payments for home health and outpatient hospital services covered under medical insurance.

Under the law, the reasonable cost of services is determined pursuant to regulations established by the Secretary of HEW. These regulations prescribe the method(s) which are used to determine costs, and the items to be included; they take into account both direct and indirect patient care costs.⁴ Reimbursement for services rendered in 1972 also is subject to regulation by the Price Commission.⁵ To implement requirements established by the Price Commission, and after coordi-

⁴For details see Title 20, Chapter III, Part 405, Subpart D.

⁵See Title 6, Chapter III, Part 300, Subpart A.

nation with other involved agencies, the Social Security Administration established standards under which an intermediary may presume compliance by a provider with economic stabilization regulation. In order for an intermediary to presume compliance, two conditions must be met: (a) the provider must certify to its compliance with economic stabilization regulations; and (b) the provider's Medicare reimbursable costs (i.e. reasonable costs as determined under Medicare requirements) must be within certain specified levels: no more than 109 percent of the institutional provider's or 105.5 percent of the non-institutional provider's total Medicare reimbursement for its previous reporting year under the program, expressed on an appropriate unit of service basis (i.e. reimbursement per inpatient day, visit, or occasion of services). Where an intermediary cannot presume compliance, the provider is referred to the District Director of Internal Revenue for a determination regarding the allowability of cost increases under the economic stabilization regulations.

Requests for Medicare payment for covered services generally are submitted by the provider of services; they must be signed by the beneficiary (or someone for him, if he is unable to do so). The provider is reimbursed on the basis of reasonable costs of covered services and bills the beneficiary for deductible and coinsurance amounts as well as for services not covered by the program.

In some instances, hospitals may bill the program on a physician's behalf for physician services rendered to inpatients. In these cases, payment is made by the HI intermediary. For this type of billing, funds are transferred from the SMI trust fund to the HI trust fund to cover the cost of these services.

The intermediary selected by the provider reviews claims for payment and pays the provider. Actual payment for individual claims is made on the basis of an interim rate established between the provider and the intermediary. Final settlement for each provider's operating year is made on the basis of a cost report submitted by the provider, and subject to an independent audit.

No payment can be made to Federal facilities except for emergency services, unless the provider serves as a community institution. In addition, payment cannot be made to a provider for those services it is obligated to render at public expense under Federal law or contract.

Supplementary Medical Insurance.—Under the medical insurance program, the Secretary of Health, Education and Welfare may enter into contracts with carriers for the performance of specified administrative functions. The carrier's principal function is to determine whether charges are allowable (reasonable) and to make payment. Carriers also have the authority and responsibility to determine, in a given case, whether a claim is for a covered service and to deny claims for noncovered or excluded items or services. In addition, carriers are to assist in the application of safeguards against unnecessary utilization of services.

The allowable charge, on which Medicare SMI payment is based, may not exceed the lowest of (1) the physician's or supplier's customary charge for the service, (2) the prevailing charges in the locality for similar services; or (3) the charge applicable for comparable services under comparable circumstances to the policy-holders or subscribers of the carrier.

Allowable charges are updated annually to take into account the actual charges physicians and suppliers have billed for covered services in the immediately preceding calendar year. The revised allowable charge levels go into effect on July 1st of each year or as soon thereafter as they can be incorporated into the carrier's payment system. Thus, for the 12-month period beginning July 1, 1971, allowable charge levels were calculated from actual charge levels for calendar year 1970. However, allowable charges could not exceed the upper limit of the prevailing charges set by regulation at the 75th percentile of customary charges (weighted by frequency) made for similar services.

For the 12-month period beginning July 1, 1972, the allowable charge levels are calculated from actual charge levels for calendar year 1971. However, because of a ruling by the Price Commission, only 40 percent of these calculated increases in allowable charge levels can be recognized for the 12-month period beginning July 1, 1972.

The ruling of the Price Commission is that the Medicare allowable charges in effect on November 13, 1971, must be considered as base prices for Phase II purposes, and that, as a result, they may not be increased by more than 2.5 percent in the aggregate during the fiscal year beginning July 1, 1972. Based on actual increases in physician and supplier billings in calendar year 1971, the charges allowed under the Medicare program for the 12-month period beginning July 1, 1972, would have been increased by about 6.2 percent in the aggregate. To implement the Price Commission's ruling, therefore, only 40 percent (2.5 is about 40 percent of 6.2) of the increases that would ordinarily have been allowed will be recognized in calculating allowable charges for the fiscal year beginning July 1, 1972.

Claims for payment of SMI benefits may be submitted to the carrier either by the patient or by the physician or other supplier of services. If the patient submits a claim (an itemized bill) directly to the carrier, he receives direct payment of benefits for covered services; he remains responsible for the physician's (or supplier's) bill. The patient may assign the benefits to a physician or other supplier of services who is willing to accept assignment. In this case, the physician (or supplier) agrees that the allowed or reasonable charge determined by the carrier is the total charge. The physician (or supplier) submits the bill and is reimbursed. In this situation, the patient remains responsible for the remaining 20 percent of the allowed charges for

covered services and the \$50 deductible (if applicable to the current bill).

Services furnished by group practice prepayment plans (GPPPs) to members are normally rendered in return for predetermined premium payments. In these cases Medicare reimbursement is made directly to the GPPP. A GPPP which exercises the option provided by law to be paid 80 percent of the reasonable cost of services (in lieu of 80 percent of the allowed charge for such services) generally deals directly with the Social

Security Administration. Plans which choose to be paid on the basis of allowed charges are reimbursed by the SMI carrier.

For bills incurred in the supplementary medical insurance portion of the program after March 1968, claims must be filed no later than the close of the calendar year following the year in which the services are furnished. For services provided during the last 3 months of the calendar year, bills may be submitted through the end of the second year following.

General Tables

Notes

Health insurance for the aged.—The program, commonly known as Medicare, that pays for part of the costs of hospital and medical services for participating persons aged 65 and over.

Type of coverage.—The program provides two types of insurance: a basic hospital insurance plan and a voluntary supplementary medical insurance plan.

Personal characteristics—

Age: In completed years at last birthday on the reference month of the table. A person is considered to have attained age 65 on the day preceeding his 65th birthday.

Race: White, all other races, or unknown as entered into the Health Insurance Entitlement master file from basic records completed by the primary beneficiary. Race unknown whether or not specifically indicated in a table, is included in the "all persons" or equivalent totals. Race is shown for an SMSA if either of the following pertains: (1) there were 10,000 or more enrollees of all other races in the area in the hospital insurance program on July 1, 1972 or (2) at least 10 percent of enrollees in the area covered under the hospital insurance program were enrollees of all other races.

Sex: As designated in the HIE master file.

Persons ever enrolled: All persons eligible for benefits at any time during 1972.

Geographic classifications.—Based on the address to which the enrollee's cash benefit check is being mailed or the mailing address recorded in the HIE master file on April 1, 1973, regardless of the reference date of the table.

All areas: Consists of the United States, Guam, Puerto Rico, Virgin Islands, other outlying areas, and foreign countries.

United States: Consists of the 50 States, the District of Columbia and residence unknown.

Other outlying areas: Consists of American Samoa, the Canal Zone, Canton Island, Caroline Islands, Mariana Islands, Marshall Islands, Midway Islands, and Wake Island.

County.—The primary divisions of the 50 States

are counties. In Louisiana, however, divisions are called parishes. Alaska is divided into 21 economic areas, shown here as the equivalent of counties. A number of cities that are independent of county organizations are reported separately in Maryland, Missouri, Nevada and Virginia. In Puerto Rico divisions are called municipios.

County unknown.—Persons whose mailing address does not permit identification of county of residence are included in figures for States, but not in figures for metropolitan and nonmetropolitan counties, or for SMSA's, with one exception. Where there is only one type of county in a State, figures for county unknown are assigned to that type.

Metropolitan and nonmetropolitan counties.—The division of counties into metropolitan and nonmetropolitan groups is based on the list of standard metropolitan statistical areas (SMSA) as published by the National Bureau of Standards under the direction of the Office of Management and Budget.¹ Except in New England, each SMSA includes a county that contains a central city of at least 50,000 inhabitants based on the 1970 Census. In addition, contiguous counties are included in the SMSA if they meet certain criteria of economic and social integration with the central city. In New England, an SMSA consists of towns and cities, rather than counties. However, the mailing address in the HIE master file is coded only for State and county. Therefore, for New England, the SMSA was replaced by the metropolitan State economic area, which is defined in terms of whole counties. Metropolitan counties are those counties that are included in an SMSA or a metropolitan State economic area. These counties are further divided into those with a central city and those without a central city. Nonmetropolitan counties are those that fall into neither an SMSA nor a metropolitan SEA.

¹ National Bureau of Standards, U.S. Department of Commerce, Federal Information Processing Standards Publication 8-2, *Standard Metropolitan Statistical Areas*, Washington, D.C.: U.S. Government Printing Office, November 1972).

SMSA, Metropolitan SEA.—See above. Only areas in the United States are listed.
